

Scallion signs MOU with Genovate

The Chennai based, Scallion Technologies Pvt. Ltd. has signed an MOU for software development and training with Genovate Solutions Pvt. Ltd, a Singapore based company.

absorbed by the Application development Centre in Chennai or by Genovate in Singapore or Australia as part of its Consulting and application development team.

According to Mr. Anton Ravindran, CEO, Genovate, the partnership with Scallion in Chennai will help in providing clients in India with Genovate's expertise in turn key projects, design, development and implementation of customized software, e-services, Training and IT consulting services - with clientele from multinational corporations, government institutions, small and medium enterprises. Mr. Ravindran further said that with the unrelenting growth of Internet (wired and wireless) and mobile computing, there is a global shortage of skilled IT professionals inspite of the dotcom saga.

Genovate is one the few companies in Singapore with significant Research and Development effort in the areas of Wireless Technologies, Unified Messaging and Speech Recognition.

Speaking about the slowdown and the timing of the launch, Mr. Gurumurthy Palani, CEO, Scallion said that in 2001 there would be 450,000 unfilled jobs in U.S due to lack of skills in emerging technologies. If a company is focussed to serve this kind of market then really it wouldn't be a problem to settle down quickly and we at Genovate are confident that we can take advantage of this situation by training students on enterprise wide technologies, CRM, SCM, data mining, data warehousing and wireless technologies.

For further information kindly contact : Mr. Gurumurthy Palani, Scallion Technologies Chennai, Ph : 820 3700 / 821 6456

Scallion is an outsourcing provider, offering expertise in legacy systems and internet integration, network operations, data and applications, and field services.
