

HR efficiency improved

GENOVATE Solutions has launched its new human resource management system (HRMS) and payroll product suite.

The eZHR • eZPay, built in pure Java and XML, is aimed at the regional SME market. The suite can be accessed organisation-wide via a Web browser.

This system allows a variety of self-service HR functions to be accomplished by both employees and managers, which increase workflow efficiency and productivity greatly, Genovate said.

The suite is available in several different versions which cater to organisations of varying sizes. Genovate is launching the eZHR • eZPay with a special offer that starts from \$599.

Details can be found at www.genovate.com.
