

HRM suite for SMEs

GENOVATE Solutions and StarHub Internet have entered a partnership that will offer Genovate's human resource management/payroll product suite – eZHReZPay – to Singapore-based small and medium enterprises (SMEs) through StarBiz, StarHub Internet's corporate services portal (www.starbiz.net.sg).

Built on Java and XML technology, eZHReZPay allows SMEs to increase productivity and efficiency through a scalable product suite.

This system is accessible from anywhere on any

Internet-enabled device for mobile employees.

Combining the eZHReZPay product suite with StarBiz allows SMEs to take advantage of the eZHReZPay features without investing in supplementary hardware infrastructure or back-office systems. This will help SMEs lower their technology infrastructure and maintenance costs.

SMEs can also benefit from StarBiz's security management system.

The eZHReZPay product suite is expected to be available in June.
