

J. Anton Ravindran

CEO & Founder - Genovate Group & KnowledgeWindow Asia Pacific Pte Ltd

It is with great pride and hope that we begin Genovate's operations in Sri Lanka. Genovate has enjoyed much growth and success over the past several years in Asia Pacific; and this new initiative is another noteworthy achievement for Genovate as well as the business ties that have existed and flourished, between Singapore and Sri Lanka for many, many years.

Genovate has always assumed the role of a business leader since inception. We have grown rapidly in the areas of Consulting/Professional Services, product development, Enterprise Scale Training and Quality Academic Programs. Indeed, Genovate has swiftly made its presence in 6 countries, within the Asia Pacific region, and have to our credit a range of Technology and Consulting Partnerships with global technology leaders. Among these are SAP, IBM, Sun Microsystems, and Oracle. The Training Partners include SAP, IBM, CA CSP and Planet 3. Genovate's wholly owned subsidiary KnowledgeWindow Asia Pacific partners with the University of Cambridge (UCLES), the University of London, the University of Sunderland, UK, the University of South Australia and Pace University, NY to offer quality academic programs.

I must thank the Government of Singapore for their support and endorsement in encouraging businesses to venture far and wide, and the Government of Sri Lanka for their express interest in assimilating current and emerging technologies. These perspectives have created a potent opportunity to fulfill the ambition of its populace to equip themselves with Key Technologies and in-demand Certifications, in an ever-increasingly complex and competitive environment.

Stemming from Genovate's Corporate Slogan "Solutions For The Changing World", Genovate has always operated on the premise that research and development, life long quality learning and self-improvement should be made available to all and is mandatory in this "Changing World".

We extend our sincere thanks to all who have laboured to make this beginning a reality. It is our privilege to have had the Office of the Minister for Commerce and Consumer Affairs of Sri Lanka, and both of our countries' High Commissions who have lent their support to our vision. Sincere thanks to Hon. Ravi Karunanayake, HE Ajit Jayaratne and HE Tan Kah Hoe. I also would like to extend our appreciation to our Principal Franchise Partner for Sri Lanka, CyberSoft.

I am certain this will prove to be another significant milestone for the Genovate Group and KnowledgeWindow and the people of Sri Lanka whose desire for continuous self-improvement and learning, is widely acknowledged.
